

## Exchange Notice 10

### Power NL & Power BE

## APX Daylight Saving Time

Dear Member,

With regards to the conversion from winter to summer time on Sunday 27<sup>th</sup> March 2015, APX would like to stress that the bidding horizon for applying date 27<sup>th</sup> March 2015 is 23 instead of 24 hours. This implies that the matching for this applying date will result in a program for 23 hours.

### Day-Ahead Markets:

Please note that hour 3 in the EuroLight® Trading System will actually apply for the period 03h00 - 04h00. As a result, there will be no result for hour 24. This is further specified in the following schedule:

Hour	Period
01	00h00 - 01h00
02	01h00 - 02h00
03	03h00 - 04h00
04	04h00 - 05h00
05	05h00 - 06h00
...	...
...	...
23	23h00 - 24h00
24	-

If you are planning on using the EuroLight Automatic Orders Submission Tool, make sure you amend the structure of the xml file accordingly.

### Intraday Markets:

EuroLight® platform:

Just as for the Day-Ahead market on 27<sup>th</sup> March the day consists of 23 consecutive hours, where hour 3 is from 03h00 to 04h00 etc. and there will be no hour 24. This reasoning applies to both the NL ID and BE ID instruments.

For Cross Border trading instrument 04 will close earlier and instrument 05 will close later:

- Instrument 04 for BE-NL Cross Border trading closes at 23:30 CET on 26-03-2016.
- Instrument 05 for BE-NL Cross Border trading closes at 03:30 CEST on 27-03-2016.

Elbas platform:

Please be aware this concerns only the Implicit Cross Border Capacity Allocation for NL-NO2. PH03160327 will not exist in Elbas for trading on Sunday 27<sup>th</sup> March.

18.03.2016
