Corporate Facts and Figures

APX is Europe's premier provider of power spot exchange services for the wholesale market, operating a transparent trading platform for power spot markets in the Netherlands, the United Kingdom and Belgium. APX provides exchange trading, central clearing & settlement and data distribution services as well as benchmark data and industry indices.

APX Products

APX Power NL

In 1999, APX Power NL started as the first independent internet based power exchange in Continental Europe, operating a Day-Ahead auction. Today, the exchange also offers a continuous trading facility for Intraday and Strips Markets in the Netherlands.

APX Power UK

APX Power UK was established in 2000 as the first independent power exchange in the UK. Today APX Power UK offers an anonymous 24/7 marketplace for integrated trading, clearing and notification for spot and prompt power contracts as well as an anonymous auction for Day-Ahead contracts.

Belpex

Belpex is the short term, physical power exchange for the delivery and off-take of electricity on the Belgian hub and a full subsidiary of APX. Belpex facilitates Day-Ahead and Continuous Intraday trading.

Clearing

APX is the central counterparty to all spot market trades; all contracts are traded anonymously, then cleared and settled on behalf of members. The exchange also provides OTC Broker Clearing services for its Power UK products.

Market Data

Exchange data is provided to members free of charge and includes historical price and volume packages. Third parties can benefit from data

services, including indices and other historical data.

Training Services

APX offers Training Services and demonstrations of the APX trading system EuroLight®. Training Services feature an in-depth explanation and an interactive demonstration of the system. They give linked departments the opportunity to better understand trading through the use of simulations.

International Development

APX shares the vision of the EU for the realisation of a single, integrated market. APX actively works together with its members, other exchanges and TSOs to provide integrated trading solutions, such as the market coupling concept and cross-border trading solutions.

APX has had a leading role in the introduction of various market couplings. Proven to be highly successful, the price coupling concept now includes the German and Luxembourgian markets too within the Central West European

(CWE) market coupling project that was finalised at the end of 2010.

The Nordic region is connected to the CWE region through Interim Tight Volume Coupling (ITVC), connecting Norway, Sweden, Finland, Estonia and Denmark to the wider CWE region. In April 2011 the BritNed electricity cable became active, linking the markets of the Netherlands and the United Kingdom. In effect, all APX power spot markets are coupled with the wider CWE and Nordic region.

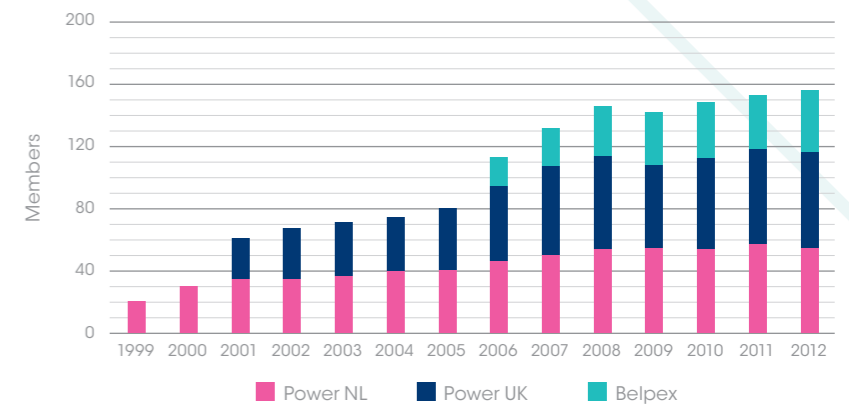

Company Profile

Key Facts

- ◆ Founded in 1999
- ◆ Frontrunner on European electricity market integration
- ◆ Offices located in Amsterdam, Brussels, London and Nottingham
- ◆ Shareholders: TenneT Holding B.V. and Elia System Operator S.A.
- ◆ Belpex is a full subsidiary of APX
- ◆ Over 150 memberships across the markets
- ◆ Total volume of power spot markets 2012: 86 TWh
